Automotive Storage Design, Supply, and Installation.

Every motor trade application, from small service areas to complete parts distribution centres can benefit from our comprehensive range of Automotive Storage Solutions. Combining tried and tested products, such as Longspan and Stormor Euro shelving, with a number of specially designed components our range provides:

Fast, efficient access to tools & components, elevating productivity

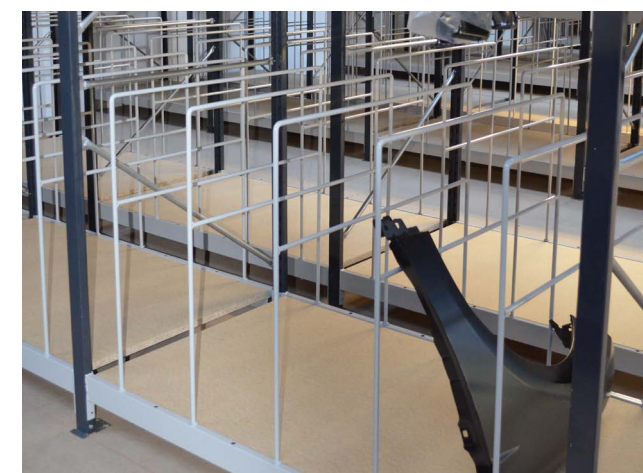

- Optimised organisation ensures tools and components are always within easy reach, cutting downtime and streamlining daily operations.
- Clear, visible labelling reduces search time, helping teams stay focused and productive.
- Smooth, uninterrupted access enhances overall workplace efficiency, boosting productivity across every task.

Enhanced stock control & intelligent inventory monitoring

- Real time inventory tracking helps prevent shortages and overstocking, ensuring the right parts are always available when you need them.
- Smart, automated systems improve accuracy by reducing waste, minimising human error, and streamlining day to day stock management.
- Improved inventory oversight boosts fulfilment speed, lowers operational costs, and enhances overall efficiency within busy automotive environments

Maximise space, streamline workflow & reduce operational costs

- Space optimised storage systems minimise clutter and free up valuable workspace, helping teams stay organised and productive.
- Improved layout and flow enhance safety and movement throughout your workshop or parts department.
- Cost effective storage design lowers overheads, boosts operational efficiency, and supports long term growth.

Longspan Shelving

Longspan shelving is a highly versatile and heavy-duty storage solution designed to accommodate large, heavy, or awkwardly shaped items. Its sturdy construction ensures stability while allowing easy access to stored components. This system is particularly well-suited for automotive and industrial storage, with specialist accessories that enhance its functionality.

Body panels can be securely stored with dividers or custom supports to prevent damage, while windscreens are kept safe using protective racks or padded sections. Tyres are efficiently organized in specially designed cradles to maintain their shape, and exhausts are neatly stored using extended shelving or custom brackets to fit various sizes. By maximizing storage efficiency and protecting valuable components, Longspan shelving helps create a well-organized and functional workspace.

Stormor Euro Shelving

Stormor Euro shelving is the UK's leading industrial shelving system, designed specifically for the efficient storage of smaller parts and components. Its modular and adaptable design makes it ideal for a wide range of industries, including manufacturing, automotive, and retail. In environments where space is at a premium, Stormor Euro shelving optimizes storage capacity, allowing businesses to store far more than expected without compromising accessibility or organization.

One of its key advantages is its flexibility. If additional storage capability is required, Stormor Euro shelving can be configured into mobile systems, which maximize space by eliminating fixed aisles, or as two-tier installations, effectively doubling the available storage area. This adaptability ensures that even in the most space-constrained environments, businesses can maintain an efficient, well-organised storage system that enhances productivity and workflow.

Storage Solutions

Automotive Storage Solutions are part of our comprehensive portfolio.
We specialise in full turnkey projects and manufacture our own mezzanine floors.

Mezzanine Floor

Partitioning

Suspended Ceilings (Fire Rating)

We also supply...

Pallet Racking

Mobile Racking

Small parts Storage

Commercial Shelving

Lockers

Commercial & Workplace
